

### **CARE OF THE ELDERLY PHYSICIAN**

Temiskaming Hospital is a 59-bed large community hospital that cares for the residents of Temiskaming Shores serving the healthcare needs of approximately 17,000 and district-wide population of 30,000 for the provision of obstetrical and level 1B nursery services, stroke services, laboratory and medical imaging (including 128 slice CT scan). Temiskaming Hospital is staffed by 257 employees, 24 Physicians and 3 Midwives. Our staff includes Regulated Health Professionals providing inpatient and outpatient services including Occupational Therapy, Physical Therapy, Social Work, Speech Therapy, Respiratory Therapy, and Clinical Nutrition.

In partnership with Sudbury's Health Sciences North (HSN), we provide Virtual Critical Care Program, satellite dialysis, chemotherapy and cardiac rehabilitation. The hospital works closely with local Family Health Teams, the Health Unit and Nurse Practitioners in our area.

Temiskaming Hospital is looking for a second family physician with a Care of the Elderly Fellowship. You will be working closely with another Care of the Elderly physician in an established practice. Consultation work is available throughout the district both in hospital and community settings. You will work in conjunction with the North Eastern Specialized Geriatric Clinic in Sudbury. Sharing the care of Long Term Care patients in the two local facilities would be possible. This could lead to the expansion to other nursing homes in the area and possibility to the Medical Director role. There is the potential to expand services in the rehabilitation and palliative care both in Temiskaming Hospital and community. The opportunity for a primary care practice within a Family Health Team setting is also an option.

Please contact Dr Don Davies (COE physician) to discuss the possibilities for enhancing geriatric care to community and sharing workload. He can be reached at [donalddavies@hotmail.com](mailto:donalddavies@hotmail.com)
